Presentation Tools at City University of Seattle

All have privacy options – contact LRC@cityu.edu

	Recording Possible	Live	Screen Content	Access	Host	Best for
PowerPoint 2013 and newer	✓	✗	✗	Office 365 account	CityU	Slide presentations alone can be directly attached to a Blackboard content area. A presenter can record their narration over slides, save as video to their YouTube channel, then browse, and embed to Blackboard with the Video Everywhere tool. A synchronized transcript is automatically generated and easy to edit.
Screencast-o-Matic	✓	✗	✓	Download or Web host	Web	Recorded presentations combining desktop content, such as slides, with audio/video of presenter using a webcam. Brand watermark appears on playback. Pro account for $15/year removes watermark and adds editing ability.
Video Everywhere*	✓	✗	✗	Blackboard and a YouTube account	CityU	Recordings with no desktop content, e.g., welcome announcement, questions in a discussion forum, demonstration in a content area, or feedback on a student assignment in the Grade Center.
Collaborate*	✓	✓	✓	Blackboard	CityU	Web conferencing where content is being shared (slides, files, desktop) in real-time. Also works for mixed conference where some are in person and some are online. Audio access through headsets, built-in teleconference, or combination.
Skype	✗	✓	✓	Application	Web	Small-group web conferences where seeing faces is the main goal. Many people already have an account and are familiar with the tool.
Google Hangouts	✓	✓	✓	Google Plus account	Web	Small-group web conferences where seeing faces is the main goal. Many people already have an account and are familiar with the tool.
Camera upload to **Youtube/Vimeo**	✓	✗	✗	Download or Web host	Web	Recordings with no desktop content (for example, an interview or an introduction). These can be embedded in Blackboard using the YouTube Mashup tool or insert/embed tool in the Blackboard content editor. Use the Video Everywhere tool to browse for video you recorded and saved to your YouTube channel.
Camera upload to **CityU server**	✓	✗	✗	Direct access to server	CityU	Recordings with no desktop content (for example, an interview or teaching session with children) that need to be securely stored for privacy, e.g. FERPA.
